

Team Name: sdmay24-47

Team Members: Jack Sebahar, Mason Wichman, Lal Siama, Nicholas Otto, Helen Lau, Isaiah Mundy

Report Period: Sept 11-Sept 24

Summary of Progress in this Period

During this period, we met with our client/advisor (Prof Ashraf Gaffar) on Sep. 20th to continue our progress with the introductory lectures on AI. We then completed our requirements, constraints, and engineering standards section for our design document. We also completed our requirements and engineering standards lightning talk assignment and prepared to potentially give our presentation during class. Instead of meeting with Prof Gaffar on Sep. 27th, we were informed that our client/advisor would change to Prof Khokhar. During this period, we continued our weekly meetings on Thursdays and continued project discussion via Discord.

Pending Issues

- Schedule meeting with new advisor
 - Discuss possible quantitative requirements
-

Plans for Upcoming Reporting Period

- Contact Prof Khokhar to plan weekly meetings
 - Discuss potential project changes due to client/advisor changes
 - Complete any assigned tasks for the course (project plans)
 - Continue weekly team meetings on Thursday
 - Begin research in problem domain and AI solutions
-
